

PACKAGING & LABELING DISCREPANCY NOTIFICATION

Reference Number: LAB-NOTIF-2026-0312 | Date: 2026-05-02

1. Reporting Entity

Reporter: Dr. John Keller (Chief Dispensing Pharmacist)

Organization: Keller Apotheke & Pharmacy Services

Email: contact@kellerpharmacy.de

Phone: +49 89 2345 6789

2. Product Identification

Product: Cetirizine 10mg Film-Coated Tablets (Box of 30)

Batch Number: CZ-8812-C

Blister Foil Print: EXP: 12/2026 | LOT: CZ-8812-C

Outer Secondary Carton Print: EXP: 12/2029 | LOT: CZ-8812-C

3. Defect Description & Investigation Request

During routine incoming stock verification, our receiving pharmacist noticed a direct date mismatch between the primary packaging and the secondary folding box. The outer carton displays an expiration date of 12/2029 (a 5-year shelf life), whereas the internal aluminum-PVC blister foil is stamped with the approved 3-year expiration date of 12/2026.

This is a packaging line coding/printing error. There is no defect in the physical integrity of the tablets themselves, and no patients have received these incorrectly marked cartons. We request corrected labeling instructions or authorization to return 120 cartons from batch CZ-8812-C.
